RE: Full Stack Java Developer

Dear Hiring Manager,

I am Prakash Vincent and I am actively looking for remote/hybrid opportunities as a Full Stack Java Developer within Australia. With over 7 years of experience in the IT industry (including 3+ years in Germany) and a strong background in software development, particularly in JavaScript, Java Spring boot, cloud-native API architecture, and microservices, and also having experience working in fintech, healthcare and e-commerce environments, along with having start-up culture experience in the past, I am confident in my ability to contribute effectively to your projects.

Throughout my career, I have demonstrated expertise in JavaScript, Java, and Spring Boot along with a strong foundation in SQL, NoSQL, and ORM technologies, and cloud deployment using Docker and Kubernetes (GCP). I have successfully led the design and development of Java and NodeJS micro-services, emphasizing highly available and reliable solutions critical to business operations.

Having worked in cross-functional agile teams, I am well-versed in the Atlassian suite of products and CI/CD tools like Bitbucket, and Jenkins, fostering a collaborative and efficient development environment. Additionally, I have a solid understanding of Restful API design principles and standards, as well as API security and authentication mechanisms such as OAuth and JWT.

I am excited about the prospect of contributing and learning from your team. I am eager to bring my technical proficiency, innovative mindset, and attention to detail to help shape the future of digital experiences.

I hold Australia's work rights and upon successful completion of interview, I can immediately relocate to a residence closer to the office location.

Thank you for considering my application. I am available at your earliest convenience for an interview and can be reached at prakashkkml@gmail.com or +61-410 010 834.

Warm regards,

Prakash Vincent
